-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 14-17 and 19-24 are presented for examination on the merits.

Response to Amendment

The amendment filed December 15, 2009, has been received and entered.

Response to Arguments

The arguments filed July 30, 2009, are deemed persuasive and the previous art rejection is removed of record. A new updated search provided a new reference which the Examiner believes reads on the claimed invention.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 14-17 and 19-24 are rejected under 35 U.S.C. 102(a) as being anticipated by newly cited Kim (US 2002/0160504), cited on enclosed PTO-892 Form.

Claims are drawn to method for culturing organic blue-green algae comprising obtaining a culture medium comprising high-nitrogen organic substance free of inorganic salts, obtaining algae, and inoculating the algae on the medium and culturing the algae in an organic environment.

Kim teaches method for culturing organic blue-green algae comprising obtaining a culture medium comprising high-nitrogen organic substance free of inorganic salts, obtaining algae, and inoculating the algae on the medium and culturing the algae in an

organic environment, note column 1, at page 2, lines 1-5 of [0023]. The culture is free of carbonate or hydrogen carbonate. The culture also can comprise edible microbes such as *Anabaena* species. Furthermore, other microorganisms are included such as *Rhodopseudomonas* species and the high organic matter is rich in protein and nutrients. See [0031], all lines, animal blood plasma and food as well as excretion wastes. The mixture is subjected to aeration and agitation to provide for an optimum pH greater than 8.0, page 5, [0069], lines 2-4. Also note [0072], lines 1-20. The specific addition of inorganic salts is not disclosed.

The claims are identical to the cited disclosure and are, therefore considered to be anticipated by the teachings therein.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the previously enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
